

Top 5 Intranet features *for 2024.*

ESSENTIAL INNOVATIONS THAT ARE SHAPING
WORKPLACE INTRANETS IN 2024

Wait a minute, I thought we were all done setting up the intranet...

As technology evolves, outdated systems can slow down communication, hinder collaboration, and reduce employee engagement. By adopting new innovations, businesses can ensure they are providing the best tools for their teams to succeed in a rapidly changing work environment.

Here are the five features that will keep your intranet - and your organization - at the forefront in 2024.

SMS NOTIFICATIONS

Keep your workforce up to date and informed with instant communications sent directly to your team's handheld devices.

MICRO ENGAGEMENTS

Engage your users quickly and simply by surfacing historical or archived information, news, tools and insights they may not have seen.

TOOL-FIRST WORKFLOWS

Supply your team members with the tools and applications that they need to avoid software bloat and overwhelm with one-size-fits-all solutions.

INTEGRATIONS

Enrich your experience with Media embedding, Microsoft and Google authentication support, Sharepoint and Docs.

COMPLIANCE

No matter how large or distributed your teams, champion process and accountability throughout your workforce with validated policies, global announcements and e-learning applications.

So what *now?*

Not sure where to start? With over 20 years of expertise, Intranet Solutions specialise in seamless implementations tailored to your organization's needs, along with guidance on design, functionality, and user management, helping you establish an efficient and effective intranet system.
